Click Search by **Article**

1. Search by authors who have published at least 'x' **Number of Articles** (Optional) (default → 0, this query takes couple of minutes to fetch due to large dataset. Please type sufficiently large article count)
2. Select **Journal/Conference name** from drop down (Optional) (default → All conference and journals)
3. Select **From Year and To Year** by clicking on up or down arrows (defaults → from year - 1954 to year - 2017 to give maximum results)
4. Export, select, sort, tooltip and logout functionality same as before
5. Additional data about author can be found by clicking on **View** button

**Clicking on View in searched result gives Author details with University name, link to home page, field of study and region (Whichever fields populated through DBLP data)**

**Clicking on home page opens the personal page of specific author in browser**

Click Search by **Committee**

1. Search authors by **Journal/Conference** through drop down list
2. Select **From Year and To Year** by clicking on up or down arrows (defaults → from year - 1954 to year - 2017 to give maximum results)
3. Export, select, sort, tooltip, view author and logout functionality same as before
